

**Hydroformed**

# METAL EXPANSION JOINTS with **FLOATING FLANGES**

## Floating Flanges Means

- **No Welding**  
No Leakages  
No Torsion  
No Stresses
- **Easier Installation.**
- **Media Contacts SS bellows only.**  
Highly beneficial for food processing  
and conveyance of aggressive media.
- **Improved Reliability.**  
*.....resulting in **LONGER LIFE***

HYDRO-FORMING technique used for forming corrugations ensures no work hardening, lesser built-in stresses & wall thinning than the conventional MECHANICAL roller forming process.

## Bellows Forming Technique

**Resistoflex**  
Hydro Forming  
Lower Stresses  
Lower Thinning

**LONGER LIFE**

**Conventional**  
Roller Forming  
Higher Stresses  
Higher Thinning

**SHORTER LIFE**

*Being increasingly specified by leading consultants and experienced users*

**Designed to EJMA standards**

Also Available :

Union Ends

Plain Ends

Fixed Flanges

Braided

Tied

• SS 304 / 316 / 321 Bellows to PN 10 / 16 / 25 • Carbon / Stainless Steel Flanges drilled to BS / ANSI / ASME / ISO / IS Standards
